## Detox / Anti Aging Test Program

Detoxify your body, obtain the power to age beautifully.

### NK Cell Activity Test

190,000 KRW

Measure your **innate immune system's ability** to function

**NK** (Natural Killer) cells are immune cells that fight **against** abnormal cells, such as **cancer cells**. As reduced NK cell activity leads to high vulnerability to infectious diseases, cancer and chronic fatigue, this test is a useful tool for monitoring the immune system.

### Basic Tests (Blood, Urine)

300,000 KRW

Basic **blood test, urine test** and comprehensive consultation

Including test results of Red/White blood cell, Platelet count, Blood sugar, **Kidney function, Liver function**, Uric acid, Homocysteine levels, Thyroid hormone, Female/male sex hormones, Adrenal Gland sex hormones, Growth hormone, **Stress hormone**, Vitamin D, Inflammation marker, Cholesterol.

### Anti-Aging Tests

600,000 KRW

Focused **anti-aging test** and comprehensive consultation

Including fat and carbohydrate metabolism efficiency, **Energy production efficiency**, Vitamin B balance, Neurotransmitter balance, Oxidative damage marker, Inflammation tendency, **Liver detoxification markers**, Heavy metal accumulation, Mineral balance.

### DNA Test

750,000 KRW~

Learn about your **genetic predisposition for diseases and lifestyle traits** to receive personalized recommendation

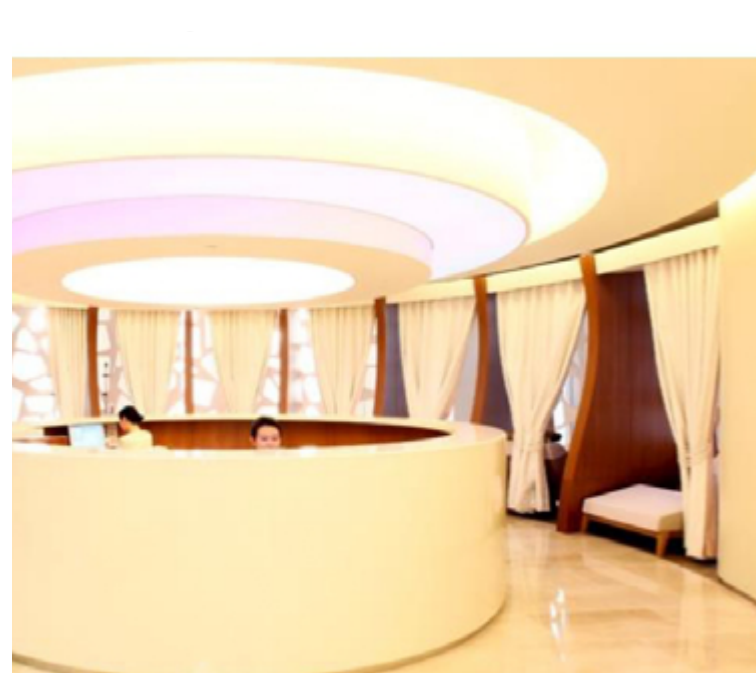

Highly recommended for people with family history of diseases, people who would like to take early measures to prevent high-risk diseases. As this test sheds light on your genetic predisposition for some of the most common diseases and cancers.

## Detox / Anti Aging Therapy Program

Detoxify your body, obtain the power to age beautifully.

### Tailored IVNT

200,000 KRW

60-90 min

Vitamins, minerals, amino acids and natural therapeutic substances

**IVNT** (intravenous Nutrient Therapy) is to cater to your specific needs and health goals. Custom-made mixture of vitamins, minerals, amino acids and other natural therapeutic substances will be provided. IVNT ensures the most efficient delivery as the formula is fed directly into the bloodstream.

### UBI Cell Photon Therapy

300,000 KRW

30 min

Increase the number of white blood cells and activate immune cells

**UBI** is a procedure that heightens the body's immune response by exposing the blood to ultraviolet light. About 50-80cc of the blood is irradiated with ultraviolet light in a closed, airtight, sterile circuit and returned to the blood stream.

### Food Therapy

675,000 KRW~

Checkup and Treatment

Test and analysis  
Prescription and recommendation  
IVNT + Oral supplementation  
Customized eating program

Several factors - lifestyle, sickness, allergies - can bog down the metabolism, keeping it from performing optimally. **Individual immune response to certain types of food, organic acid metabolites in the urine, accumulation of toxins and minerals in the tissue and nutritional status** can all be tested and analyzed.

### Invigoration & Immunity

900,000 KRW

1 Month Korean Medicine

Using **herbal medicine (customized)**  
Restore **innate healing ability**  
Strengthen the **immune system**

The medicine uses natural medicinal herbs tailored to each individual, not only help deal with chronic fatigue, but also provide nourishment for women during menopause and women in postpartum recovery.

## Skin Care Program

Regain youthful looks with enhanced inner glow and healthy skin from inside out

### Lymph Therapy

495,000 KRW

60 min

Lymph circulation  
Detox treatment

**En**dermology uses a combination of rolling and suction to massage and shape the skin and its underlying structures. First and foremost, the procedure helps **improve blood circulation and stimulate lymphatic drainage to eliminate metabolic toxins**. Ultimately, it shrinks the fat cells, toning and firming up the body.

### FMS Lifting Skin Care

330,000 KRW

70 min

Correct facial asymmetry  
Tighten sagging skin

**Fa**cial skin care that uses low frequency waves to stretch and relocate small muscles that are not used frequently. After a series of manual massage that relaxes the neck and drains out the lymph nodes, a coated, charged wands are used to massage the facial muscles.

### Stem Cell MTS Therapy

495,000 KRW

90 min

Stem cell therapy  
Face rejuvenation

**St**em cell skin care that reduces wrinkles and makes the skin healthy from the inside. In addition to the FMS Lifting Skin Care, **micro-needles are used to help the skin absorb stem cell culturing fluid**, which is abundant in growth factors. Not only do the growth factors facilitate the growth of skin cells, but it also leads to overall facial rejuvenation.

### Premium Repagen Care

1,155,000 KRW

120 min

Improve skin texture  
Reduce pores  
Moisturization

**Re**pagen treatment reduces fine lines around the face by activating and cleansing the face from the inside of the skin. It does wonders in improving skin textures, reducing pores, and smoothing out fine wrinkles. According to test results, 35% of people said Repagen helped with **wrinkle improvement** and 31% of people said that their face became **much more moisturized**.

\*Please contact us separately for botox, filler, laser, injection, and other dermatology treatments\*
